

## VS-Newsletter Yahoo Group Settings

When you join our VS-Newsletter Yahoo Group, there are some important Setting Options that you need to choose in order to receive the types of messages that you desire. If you only wish to receive Vermillion Stitchery announcements, (and not receive messages from other members of the group), you will need to change your Message Deliver Options.

If you would only like to receive the announcements of our new designs, (and not receive any other emails from the group), you will need to **Set the correct Message Delivery options.**

## Step 2. Message Delivery

Yahoo! Groups lets you choose how you stay in touch.

### Individual Email

The option to choose if you want to get each group message and special notice individually and immediately, as it is posted.

### Daily Digest

The option to choose if you want to see all messages but limit the amount of email you receive. We'll compile an email of up to 25 messages and send daily (special notices too!).

### Special Notices - Receive only important email notices from the group moderator.

Web Only - Don't get notified of the latest happenings. Read messages only on the web.

On the Edit Membership page, change your **Message Delivery Options** to **Special Notices**.

The default setting is Individual Email. ***You will need to change this to Special Notices to avoid receiving messages from other members of the group.***

Scroll down to the bottom of the page and click on **Save Changes**.
